Claim 1 (original): A trimmer comprising a cutting head housing a cutter means, and an

elongate shaft for supporting the cutting head, the cutting head connected to the shaft by

connection means permitting the cutting head to be positioned with its cutter means either

substantially horizontal or substantially vertical without disconnecting the cutting head

and the shaft, the shaft having a hand-grippable portion at a position remote from the

cutting head, the arrangement being such that the line joining a point within the hand-

grippable portion and the connection means is substantially parallel to plane of rotation

of the cutter means when the cutter means is substantially vertical.

Claim 2 (original): A trimmer as claimed in claim 1, wherein the connection means is

such that the cutting head is movable between positions in which its cutter means is

substantially horizontal and substantially vertical in a single movement.

Claim 3 (original): A trimmer as claimed in claim 1 or claim 2, wherein the connection

means is such that the cutter means is movable between the substantially horizontal

position and the substantially vertical position by an effective rotation of the cutting head

relative to the handle of 120° in one direction or 240° in the other direction.

Claims 4-18 (cancelled).
